 Accident and Condemnation  
 Cases a Specialty.  
 Suite 1520 to 1524 Unity Building,  
 79 Dearborn Street.  
 Reference to Clients Upon Application.

**Omelates at Royal Weddings.**  
 The Most Reverend Edward White  
 Benson, ninety-third archbishop of  
 Canterbury, has officiated at the great-  
 est number of royal marriages. Arch-  
 bishop Benson officiated at the three  
 following royal weddings, namely: The  
 royal highness Princess Beatrice to the  
 late Prince Henry Maurice, of Batten-  
 berg, on the 23d of July, 1885, at Wip-  
 plingham Church, in the Isle of Wight;  
 her royal highness Princess Louise,  
 eldest daughter of the Prince of Wales,  
 to the Duke of Fife, at the Chapel  
 Royal, St. James, London, July 22,  
 1889, and his royal highness George  
 Frederick, Duke of York, to Princess  
 Victoria May of Teck, at the same  
 chapel July 6, 1893. He will in all prob-  
 ability officiate at a fourth royal wed-  
 ding July 22 next—that of Princess  
 Maud, of Wales, to Prince Charles, of  
 Denmark.

**One of Nature's Marvels.**  
 It is generally believed that when  
 the pulsation of the human heart sinks  
 to 40 per minute, death is certain to  
 ensue unless restoratives are promptly  
 applied. But the Paris doctors have  
 been greatly puzzled with the case of  
 a man in one of the hospitals, whose  
 pulse is as low as 18 beats to the min-  
 ute, though, to all appearances, he is  
 well and strong.

The people who go to hell ought to  
 have wings so they would have some-  
 thing to brush the hearth with.

**Moritz Kaufman**,  
 Justice of the Peace.  
 Friedensrichter.  
 Office, 534 Lincoln Av.,  
 Corner Sheffield Av.

 of the  
 Peace.  
 146 and 148 West Madison St.

**HON. KICKHAM SCANLAN**  
 The Eminent Chicago Lawyer.

## MEN WHO FIGHT FIRE

## HOW THEY ARE TRAINED FOR THEIR WORK.

Drilled in the Art of Scaling High  
 Buildings—Handle Long Ladders  
 with Wonderful Ease and Celerity—  
 No Time Is Lost.

**Powerful and Agile Athletes.**  
 Every fireman, engineer, and  
 truckman in the service of the fire de-  
 partment of large cities is drilled week-  
 ly in the duties of a hook and ladder  
 company. Not only  
 the men serving on  
 the hook and lad-  
 ders know how to  
 lower a man or wo-  
 man by means of a  
 rope from a burn-  
 ing building, but  
 when a fireman or  
 engineer is need-  
 ed he is as well  
 trained as any to  
 take an active part  
 in saving life, and  
 can do it as well as  
 he can handle an  
 engine or turn a  
 hose where it does  
 the most effective  
 work.

Although this  
 drill usually takes place at every hook  
 and ladder house on some day of  
 every week, it never ceases to be an  
 interesting sight to the neighbors and  
 passersby. Men and boys are never  
 too busy to stop and watch the blue-  
 shirted men as they nimbly run up the  
 ladder, and then pass it on to the win-  
 dow above.

When Marshal Horan and Capt.  
 Thomas O'Connor, of hook and ladder  
 No. 6, at Chicago, gave the order for  
 a drill one day last week four men im-  
 mediately began to get themselves  
 ready. They were Lieut. James Cum-  
 ingsham, John Tierney, Patrick Sulli-  
 van, and William Thompson. The first  
 thing done by the quartet was to bring  
 into the alley upon which the engine  
 house is situated four long ladders.  
 Then they all fastened a broad leather  
 belt about their waists. These were  
 about six inches wide, and in front had  
 a tremendous hook of steel.

"Up you go," called Capt. O'Connor,  
 and the four men pommel drill began.  
 The sixteen-foot ladders, with which  
 lives are to be saved and that all egress  
 by stairs is stopped by smoke and  
 flame, were seized as though but a  
 featherweight. At the top of each lad-  
 der is a long iron hook. This is notched  
 so that it will catch in any width  
 window sill. The first man to mount  
 fastened the ladder securely to the sec-  
 ond story window and swiftly ran up  
 the rounds. As soon as he reached the  
 top he opened the big hook at his belt  
 and snapped it about the top round.  
 Then he put out his hands for the next  
 ladder, and it was quickly handed up  
 to him. This he raised high in the air,  
 hand over hand, fastened it on the third  
 floor window, tried its strength to see  
 that it was secure, then quickly ran up.

**SINGLE MAN LADDER DRILL.**

As he went up this he was followed up  
 the first ladder by the second man  
 waiting below. As he reached each  
 floor his maneuver was the same.  
 When he reached the top of the second  
 ladder the second man was at the top  
 of the first. Both men hooked them-  
 selves safely and put out their hands  
 for the ladder below. Quickly it was  
 passed from the third man at the foot  
 to the one on the top of the first ladder.  
 By him it went to the fireman above.  
 Then the third man ran briskly up and  
 the fourth and last one began the  
 mount. By the time he had reached the  
 top of the ladder that stood firmly

upon the ground his brother fireman  
 has passed the fourth ladder to the  
 man at the top. Here it was fastened  
 to the summit of the tower, and the  
 first man to mount was soon looking  
 below to Capt. O'Connor for orders.  
 "All the way down!" shouted the  
 Captain.

And without one moment for breath  
 the descent began.

Each man came down from the top  
 of the ladder upon which he had stood,  
 and snap went three hooks upon the  
 round of the ladder. The ladder at the  
 top was as a wisp of hay in the pow-  
 erful arms of the man at the third floor  
 window. He took it from its place and  
 quickly lowered it to the man below.  
 This one passed it on with the same  
 rapid movement, and in a second more  
 it was on the ground and resting  
 against the building. Down ran the  
 three men. The one who had removed  
 the ladder stepped aside, and his place  
 was taken by the next to dismount.  
 The same course was taken until the  
 three others were safely on the ground  
 once more and the four ladders stand-  
 ing against the firehouse.

The "two men drill" is very similar,  
 except that only two ladders are used,  
 one man passing up the lower ladder  
 to the man above him, and then run-  
 ning up the two ladders and in turn

**LOWERING MAN FROM A WINDOW.**

receiving the lower one from his con-  
 trade. The "one man drill" is perfor-  
 med with one ladder. The fireman fixes  
 it to a window above him, mounts to  
 the sill of the upper window, raises the  
 ladder another story, and so on until he  
 has reached the height desired.

The rope drill, likewise, always at-  
 tracts curious crowds. The noose of  
 a rope is placed around the waist of  
 the person to be lowered, and the fireman  
 who lowers him gives the rope two or  
 three turns around the hook in his belt.  
 Then he pays it out as slowly or as  
 fast as desired. Persons are taken  
 from buildings with ropes, or dropped  
 into nets, when flames or smoke pre-  
 vent the use of stairways or ladders.  
 The net is a circle of woven rope about  
 four feet across. The rope is an inch  
 thick and the meshes are close. Ten  
 or more men take hold of the net, and  
 the persons rescued are dropped into it.  
 When the fireman executes this drill  
 they drop from a hole first into the  
 net with the precision of circus  
 acrobats.

"It's a fine thing," said the Marshal.  
 "But it don't always work. On a dark,  
 black night we hate to use it, for we  
 can't always tell that we are directly  
 under the one that is to jump, and then  
 it is fatal."

## A Collection of Teapots.

There are fads and fads, but among  
 the queerest, perhaps, is that of an  
 English woman who is collecting Japa-  
 nese teapots. She has spent several  
 years in the land of the Mikado and  
 while there has accumulated more  
 than 1,000, of which no two are of the  
 same pattern. The collection is val-  
 ued at \$5,000. One is like an old man  
 whose head formed the lid, and could  
 be set at any angle. Others are in  
 the shape of birds, beasts and fowls,  
 not to mention fish, frogs, a beetle or  
 two, and a fat, squirmy eel. Buddha  
 even was pressed into service as a  
 model. There are lotus bud pots, and  
 other pots in semblance of a teahouse.  
 One huge caldron-like affair holds  
 three gallons, and at least a dozen  
 specimens would not contain a thim-  
 bleful. Among these are several swans,  
 all true to life, correct to the last curl  
 of neck and feather, and of a size to  
 be hidden in the palm of your hand.

## Fecund Insects.

M. Fougeard says that a single pair of  
 aphides will bring 1,000,000,000,000,  
 000,000 individuals of their kind into  
 existence in a single season of five  
 months, or, say, during the months of  
 May, June, July, August and Septem-  
 ber. No other known species of insect  
 which can be seen with the naked eye  
 breeds with anything like such amazing  
 rapidity.
